Donna Dickenson : Bioethics: All That Matters before purchasing it in order to gage whether or not it would be worth my time, and all praised Bioethics: All That Matters:

In this book: Donna Dickenson - Winner of the International Spinoza Lens AwardShould we do what ever science lets us do?Bioethics: All That Matters, new developments in biotechnology like genetics, stem cell research and artificial reproduction arouse both our greatest hopes and our greatest fears. Many people invest the new biotechnology with all the aspirations and faith once accorded to religious salvation. But does everyone benefit equally from scientific progress? Commercialised modern biomedicine runs the risk of exploiting vulnerable groups, from Indian 'surrogate' mothers to professional guinea pigs in drug research. Professor Dickenson argues that although we've entered new

scientific territory, there's no need to jettison our existing moral sense. By discussing a range of real-life cases, she equips readers to make up their own minds on these important and controversial questions. Good science and good ethics needn't be contradictory. This accessible and concise book will appeal to both students and general readers, giving a fascinating introduction to a wide range of perspectives on Bioethics. "an ideal introductory guide to topics such as stem cell technology, reproductive tourism, patent law and cognitive enhancement." John Illman, Healthwatch

The All That Matters series: All That Matters books: All books in the All That Matters series are written by world experts in their subject field. These experts work to distil a topic and get right to its heart, making the book accessible for both students and general readers. Each compelling book contains new and interesting perspectives and tells stories that matter.

The Author: Donna Dickenson is Professor of Medical Ethics and Humanities at the University of London. Prior to that she has researched and taught at the Universities of Yale and Oxford. Donna won the International Spinoza Lens Award for her campaigning work in the field of bioethics. She also co-wrote the widely used Cambridge Medical Ethics Workbook. Keep up with Donna Dickenson on her website: www.donnadickenson.net.

Other books in the All That Matters series: All That Matters - Interesting introductions to important issues. 'She is good on many of the issues.' Guardian Book Blog

This book provides an accessible and readable introduction. This is a timely and provocative read that will challenge the reader to produce his (or more likely her) own counterarguments.

Soren Holm, Times Higher Education

Dickenson manages to combine a wealth of fact and opinion alike into one bite-sized digest. The text also poses some interesting questions that transcend medical, legal and philosophical boundaries. This is a thought-provoking book that stimulates much further consideration after reading.

BioNews

A thoughtful, intelligent, highly readable work written by someone with impeccable credentials

Financial Times on Body Shopping

A highly accessible guide to the ethical implications of biotechnology for the well-designed and edited All That Matters series... Dickenson defuses jargon and makes history compelling.
