From Oxford University Press : Biometrika: One Hundred Years before purchasing it in order to gage whether or not it would be worth my time, and all praised Biometrika: One Hundred Years:

0 of 1 people found the following review helpful. Delivers exactly what it promisesBy JosFine!

The year 2001 marks the centenary of Biometrika, one of the world's leading academic journals in statistical theory and methodology. In celebration of this, the book brings together two sets of papers from the journal. The first are specially commissioned articles that review the history of the journal and the most important contributions made by papers in the journal to a number of important areas of statistical activity, including general theory and methodology, surveys and time sets. The second group are a selection of particularly seminal articles from the journal's first hundred

years. In the process these papers give a full description of the general development of statistical science during the twentieth century.

"I found it irresistible"--International Journal of Epidemiology" Authoritative but accessible, the reviews provide an impressive survey of statistical science development during the twentieth century."--Publication of the International Statistical Institute
About the Author Donald Michael Titterton is a Professor of Statistics, University of Glasgow.
David Cox is an Honorary Fellow, Nuffield College, Oxford.
