From Brand: American Heart Association : BLS for Healthcare Providers (Student Manual) before purchasing it in order to gauge whether or not it would be worth my time, and all praised BLS for Healthcare Providers (Student Manual):

6 of 6 people found the following review helpful. This is NOT a textbook By Amazing Customer I thought this "Student Workbook" would be just like the regular textbook but with added practice problems, but that is not the case. The book has no text content at all, just practice such as crossword puzzles, fill in the blank, and multiple choice. I'm sure the book is great for testing your knowledge, but don't make the same mistake I did and think that this book will have pages filled with text and information. 7 of 7 people found the following review helpful. This is book has the 2010 American Heart Association guidelines ... By Customer This is book has the 2010 American Heart Association guidelines that is required for Healthcare Provider training. Note: The guidelines change every 5 years. The new books

with the 2015 guidelines should be available in early 2016. It takes the AHA about a year to make the books available start teaching the new guidelines once the guidelines are announced. 3 of 3 people found the following review helpful. Very informative
By nicole wilson I bought this book for my BLS class I took last month, the book itself is very informative and is great to look back on, however while in the 4 hour class we were never asked to open it.... So in the long run it really wasn't nessasary that I purchased it.

gently used with a slightly worn cover. updated version. I used it for my recent CPR class.
