Frank W. Drislane MD, Dr. Michael Benatar MD, Bernard S. Chang MD, Juan A. Acosta MD, Andrew Tarulli, Louis R. Caplan : Blueprints Neurology (Blueprints Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised Blueprints Neurology (Blueprints Series):

0 of 0 people found the following review helpful. Highlighted what was important and was an overall easy read. Make sure to do the corresponding section ...By OhioCalHighlighted what was important and was an overall easy read. Make sure to do the corresponding section on USMLEWorld; the questions are nearly identical to the shelf exam!- U.S. med student1 of 1 people found the following review helpful. Enough for a shelf examBy C. ChangI used this book alone (with the 100 questions at the end) and did fine on my neurology shelf exam.The book is concise and comprehensive, but it probably covers too much material that is not tested on the shelf and misses about 20% of the information that is tested.2 of 2 people found the following review helpful. Great SeriesBy ajarthur99I loved this series in Medical School, but this, Psychology (old edition) OB/gyn were not that helpful when it came to the Shelf

exams. Still an all-around good resource with the essential basics, just not always what you see on the exams.

Blueprints Neurology provides students with a complete review of the key topics and concepts perfect for clerkship rotations and the USMLE. This edition has been completely updated including new diagnostic and treatment information throughout while maintaining its succinct, organized, and concise style. 100 board-format questions and answers with complete correct and incorrect answer explanations appear at the end of the book.
