**Francis L. Brannigan, Glenn P. Corbett : Brannigan's Building Construction For The Fire Service** before purchasing it in order to gage whether or not it would be worth my time, and all praised Brannigan's Building Construction For The Fire Service:

0 of 0 people found the following review helpful. It's alright.....By MartinThis book is decent in theories but as far as the explanation it is quite vague when it comes down to construction terms. I read this book mainly because I heard nothing but good things about the course that is offered to departments, but reading this you would have to be a carpenter to understand all the terms that are used and even worse a lot of them aren't in the glossary.In a nutshell: decent book but keep your tablet handy to google a plethora of words and to see diagrams of what exactly is being written about.0 of 0 people found the following review helpful. Take a building construction class.By Mike FNo useful information just some old fireman telling war stories...1 of 1 people found the following review helpful. Good

book for the experienced or rookie firefighterBy Stephanie I. Very good book for those who enjoy the construction aspect of the job, or have found a career in firefighting without properly educating themselves in construction. All construction description are writing from a firefighting point of view making it slightly more interesting, even if those features are not found in your district.

Brannigan's Building Construction for the Fire Service, Fourth Edition is a must read for fire fighters, prospective fire fighters, and fire science students. This edition continues the Brannigan tradition of using plain language to describe technical information about different building types and their unique hazards. This text ensures that critical fire fighting information is easy-to-understand and gives valuable experience to fire fighters before stepping onto the fireground. The first edition of Building Construction for the Fire Service was published in 1971. Frank Brannigan was compelled to write the most comprehensive building construction text for the fire service so that he could save fire fighters lives. His passion for detail and extensive practical experience helped him to develop the most popular text on the market. His motto of: Know your buildings, informs every aspect of this new edition of the text. Listen to a Podcast with Brannigan's Building Construction for the Fire Service, Fourth Edition co-author Glenn Corbett to learn more about this training program! Glenn discusses his relationship with the late Frank Brannigan, the dangers of heavy construction timber, occupancy specific hazards, and other areas of emphasis within the Fourth Edition.
