Clear picture of private practice of Hippotherapy By Barbara K Rector This little book is tremendously helpful for both the professional clinical specialist in Hippotherapy as well as program directors, consumers and horse facility stewards. Potential referents will also find it a valuable resource.

The Brown Pony Series Book Four: The Business of Hippotherapy is written for therapists who dream of entering into the arena to combine horses in their professional treatment plan with clients. The book is laid out in a logical manner beginning with a section called "Common Practice", formatted as questions and answers about how other therapists

offer hippotherapy. Section two introduces "Getting Started" in hippotherapy by presenting ideas on legal structure and limiting liability. Then practical advice is explored regarding the facility and the therapy horses. Many therapists have difficulty charging clients and the fourth section covers budgeting and fee setting. One caveat of offering treatment in a natural environment with multiple support staff and a living animal inevitably is the risk of therapy cancellations and this topic is presented with multiple years of statistics. Finally, dozens and dozens of business form samples are offered to you in the appendix. What books are available in the Brown Pony Series?
