As a pet owner I always read the pet food labels. Till I read this book I was unaware of how misleading those labels can be. I have come away from this book with a much better understanding of the nutritional needs of my pets and how to feed them to promote health and longevity. I also have gained some insight into how to spot signs of nutritional deficiencies in my pets. Surprisingly two of the writers of this book appear to work for Iams, a rather large and well known pet food company. This book was far from biased for the pet food industry nor did it appear to promote any pet food. This book has changed my view of the pet food industry and I will be much more cautious in the future. I am revamping my pets' diets today! I feel this book is a must for anyone who owns a cat or a dog.
