**David Levine, Darryl L. Millis : Canine Rehabilitation and Physical Therapy, 2e** before purchasing it in order to gage whether or not it would be worth my time, and all praised Canine Rehabilitation and Physical Therapy, 2e:

6 of 6 people found the following review helpful. Excellent textBy Forsyth, GAThis new edition is well worth the purchase, whether you have a special interest in rehabilitation or are in a general small animal practice. It's wonderfully thorough, and has added much to the previous edition. I have every canine rehab text, and while they're all complementary to each other, this is the most comprehensive one. The layout is easy to follow and they have added good coverage of basic physical therapy concepts- very helpful to me as a DVM. The authors have made all of these concepts clear and easy to apply to the variety of patients we see. It's a really helpful, enjoyable resource to have on hand.0 of 0 people found the following review helpful. Great book!By JenI teach Canine Massage classes and this book is awesome!2 of 2 people found the following review helpful. Canine Rehabilitation and physical therapy, 2eBy usermycaaExcellent reference in canine rehabilitation. Well organized chapters and subjects. Best all around reference

out there that includes all aspects and subjects of canine rehabilitation. If you must have one rehab book in your shelf, this is it. Companion site has excellent videos showing exercises and forms for the initial and daily evaluation of rehab patient. Congratulations to the authors and all the contributors, it was worth to wait for this book.

Bridging the gap between human physical therapy and veterinary medicine, *Canine Rehabilitation and Physical Therapy*, 2nd Edition provides vets, veterinary students, and human physical therapists with traditional and alternative physical therapy methods to effectively evaluate and treat dogs with various debilitating conditions. Coverage includes treatment protocols for many types of cutaneous, neurologic, and musculoskeletal injuries to facilitate a faster and more complete recovery. "Overall, this book is an extensive text for anyone interested in pursuing canine rehabilitation and physical therapy" Reviewed by: Helen Davies, University of Melbourne on behalf of Australian Veterinary Journal, March 2015 Invaluable protocols for conservative and postoperative treatment ensure the successful healing of dogs and their return to full mobility. Printable medical record forms on the companion website, including client information worksheets, referral forms, orthopedic evaluation forms, and more, can be customized for your veterinary practice. Six completely updated chapters on exercising dogs define the basic principles of aquatic and land-based exercise and how they may be applied to dogs, as well as how physical therapy professionals can adapt common "human" exercises to dogs. Numerous chapters on therapeutic modalities, including therapeutic lasers, illustrate how physical therapy professionals can adapt common "human" modalities to dogs. Physical examination chapters offer comprehensive information on orthopedics, neurology, and rehabilitation. NEW! Companion website with 40 narrated video clips of modalities and exercises used by physical therapists demonstrates effective ways to treat various neurologic and musculoskeletal problems in dogs. NEW! Fourteen new chapters describe the latest advances in the areas of joint mobilization, rehabilitation of the athletic patient, biomechanics of rehabilitation, therapeutic lasers, and physical therapy for wound care.

"Overall, this book is an extensive text for anyone interested in pursuing canine rehabilitation and physical therapy or for those intending to refer dogs to such practitioners." ed by: Helen Davies, University of Melbourne on behalf of Australian Veterinary Journal, March 2015 About the Author David Levine, PT, PhD, DPT, Diplomate ABPTS, CCRP, Cert. DNDr. Levine is a professor and the Walter M. Cline Chair of Excellence in Physical Therapy at University of Tennessee at Chattanooga. He is also an adjunct associate professor at the University of Tennessee College of Veterinary Medicine, and an adjunct professor at North Carolina State University College of Veterinary Medicine.
