Terry Des Jardins : Cardiopulmonary Anatomy Physiology: Essentials for Respiratory Care, 5th Edition

before purchasing it in order to gauge whether or not it would be worth my time, and all praised Cardiopulmonary Anatomy Physiology: Essentials for Respiratory Care, 5th Edition:

0 of 0 people found the following review helpful. Cardiopulmonary Anatomy Physiology: Essentials for Respiratory Care...By Va Patriot Okay all of you aspiring RTs - you need this text. You're in college, so you need to save money. Used books are, of course, the way to go...The difficult part is finding a good price from a reputable seller - that's where shines: Check the reviews. My copy was in better condition than I had expected, at a great price and it was shipped fast, so, you might want to check this seller's inventory next time you're looking for books...1 of 1 people found the following review helpful. Nice introduction By Craig Jackson The explanations and details have been simplified for easy digestion in an intro course. My anatomy text contained many many more details in the

overlapping chapters. The online course materials are quite lacking. The accompanying CDROM is mostly useless. If the book is required in your respiratory care curriculum, that would not be a bad thing. It works.0 of 0 people found the following review helpful. Five StarsBy Jook

This innovative, best-selling book provides the most complete and accurate information about the structure and function of the respiratory system. The relevance to respiratory care practice clearly sets this resource apart, with clinical scenarios to challenge your application of principles and formulas as well as numerous illustrations of common pathological conditions such as cystic fibrosis, chronic bronchitis, and asthma.

About the Author Terry Des Jardins, M.Ed, RRT is Professor Emeritus in the Department of Respiratory Care at Parkland College in Champaign, IL where he taught for 35 years. He still actively lectures third year medical students on clinical manifestations and assessment of respiratory disease and cardiopulmonary physiology at the University of Illinois College of Medicine at UrbanChampaign.
