ReveiwBy Robert mulkeyThis book did not help me very much and was confusing and I did not understand it muchReview0 of 0 people found the following review helpful. Very disappointed since the title looked like it would be of ...By Kiki CarThis is a pamphlet, not a book. Plus the audience and references are definitely local (the Carribbean) and not national which wasn't indicated anywhere in the write-up.

Very disappointed since the title looked like it would be of interest to my son graduating college. Not very encouraging when the advice for interviewing is to be upfront about your criminal record (!?)

This book is part of a series of books with a simple twofold objective: The first aim is to expose young people to the fact that there are many careers out there. Some that they may not have considered some they may have thought about but have rejected for various reasons. We are here to tell you that once you approach your career choice in a professional, logical and business manner there is no reason why you should not pursue your dream. The second aim is: Get educated!!!! If you are in school stay in school. The longer you can stay in school and get a formal education the easier it will be to market yourself. Make no mistake the level of your education: primary, secondary, college or university will decide the level of the job that you end up with. Finally, this book like all the others I have written is in plain, ole, simple English so that we can all understand. So in the age old question. What do you want to be when you grow up? Let's explore together.
