Eric S. Pelletier PT DPT PCS C/NDT, Erin E. Jobst : Case Files in Physical Therapy Pediatrics (Communications and Signal Processing) before purchasing it in order to gage whether or not it would be worth my time, and all praised Case Files in Physical Therapy Pediatrics (Communications and Signal Processing):

Thirty pediatrics physical therapy cases sharpen students critical thinking skills and prepare them for real-world practice. This unique review features case studies that help physical therapy students successfully transition from coursework to clinical work. Each case includes a discussion of the health condition, examination, evaluation, diagnosis, plan of care, and interventions, evidence-based practice recommendations, and references. NPTE-style review questions accompany each case, reinforcing students learning. These case studies give students practical experience before they actually work with patients and helps build the confidence they need to succeed in real-world clinical practice.

About the Author Series Editor: Erin Jobst, PT, PhD is an Assistant Professor at the Pacific University School of Physical Therapy. Eric Pelletier is an Assistant Professor in the Physical Therapy program at the University of the Sciences in Philadelphia.
