RAND Corporation, Gabrielle Bloom, Jennifer Brower, Noreen Clancy, Stuart S. Olmsted : Case Studies Existing Human Tissue Repositories:Best Practic before purchasing it in order to gage whether or not it would be worth my time, and all praised Case Studies Existing Human Tissue Repositories:Best Practic:

Case studies of twelve existing human biospecimen repositories performed to evaluate their utility for genomics- and

proteomics-based cancer research and to identify "best practices" in collection, processing, annotation, storage, privacy, ethical concerns, informed consent, business plans, operations, intellectual property rights, public relations, marketing, and education that would be useful in designing a national biospecimen network.

From the Inside FlapInsights and information from a study of twelve human tissue repositories
