**Louis C. Gapenski, PhD, George H. Pink : Cases in Healthcare Finance, Fourth Edition** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Cases in Healthcare Finance, Fourth Edition:

0 of 0 people found the following review helpful. Concepts are explained well enough, but calculations are confusing ...By ronit yarden Concepts are explained well enough, but calculations are confusing as multiple parameters in each example have the same numerical value and it is hard to discern which parameters are used: For example value of SD equals the value of Average and the value of NPV and it is not clear which one should be used and when. 0 of 0 people found the following review helpful. Good book! Good supplemental information to the actual text By Some RobeI rented this book for my Advanced Financial Management course for my masters program. Good book! Good supplemental information to the actual text. 1 of 1 people found the following review helpful. Excellent By Bruce S. Weinberg Excellent detailed problem sets relating to healthcare finance. Should be used with another reference text, but provides good information and challenging problems.

With this casebook, students have the opportunity to apply finance principles and concepts to a setting that simulates an actual work environment. Thus, this book creates a bridge between academic learning and applied practice. Each of the 30 finance cases presents a comprehensive picture of the organization, along with a relevant financial-management challenge that you must solve. The majority of cases are accompanied by spreadsheet models to help you perform analysis and calculations. Also provided are six mini ethics cases to provoke thought about financial situations with ethical implications.

About the Author Louis C. Gapenski, PhD, is a professor in both health services administration and finance at the University of Florida. He is the author or coauthor of 27 textbooks on corporate and healthcare finance. He has published over 25 journal articles related to corporate and healthcare finance.
