The perfect complement to Gapenski's Healthcare Finance and Understanding Healthcare Financial Management, this new workbook consists of 26 finance cases and six ethics mini-cases. The cases can be used both at the introductory level, with questions provided for additional guidance, and at the more advanced level, in which students must develop their own solution approaches. Most finance cases have an accompanying spreadsheet model, and an Excel disk containing the models is included with the book. The models allow students to easily create graphics and other computer output that enhance the quality of their analyses.
