Donald B. Freed : CD for Freed's Motor Speech Disorders: Diagnosis Treatment, 2nd before purchasing it in order to gauge whether or not it would be worth my time, and all praised CD for Freed's Motor Speech Disorders: Diagnosis Treatment, 2nd:

Contains real-life case studies of patients with motor speech disorders, including high-quality video clips that allow students to see and hear actual patients, read their case histories, and apply their knowledge when making observations.

About the Author Donald B. Freed, Ph.D., is chair of the Department of Communicative Disorders and Deaf Studies at California State University, Fresno. He received both his M.S. and Ph.D. from the University of Oregon. Prior to joining the Fresno faculty, he worked as a speech pathologist in acute care and rehabilitation facilities and served as a research speech pathologist at the Portland Veterans Affairs Medical Center. His research has concentrated on adult language and motor speech disorders, including word-finding problems associated with aphasia. He has published numerous articles in journals such as Aphasiology, Clinical Aphasiology, American Journal of Speech and language
