Excellent resource!By Jaclyn N SeppI teach an introductory class on play therapy and this has been wonderful for my students! Very well organized and elicits wonderful discussions.

This indispensable workbook successfully combines the foundational content needed to orient play therapists to the child-centered approach with an engaging series of reflective and experiential activities designed to help develop therapeutic competence. The many activities included here allow readers to engage in an interactive process to learn the philosophy and skills of child-centered play therapy: seeing the world through the child's eyes, empathizing, tracking, setting limits, recognizing childhood as culture, identifying themes and stages of therapy, and more. Throughout, the authors provide a personal backdrop for learning and living the child-centered play therapy philosophy, based on their many years conducting and supervising play therapy sessions. Both budding and seasoned play and child therapists stand to gain richly from their insights.

Overall, the Child-Centered Play Therapy Workbook is a practical manual and resource to students of CCPT. Additionally, the book is useful to play therapy supervisors working with supervisees learning CCPT, providing many developmental resources. --Gabriel I. Lomas, *Play Therapy*
