Dr Nick Begich, James Roderick : Earth Rising II: The Betrayal of Science, Society and the Soul before purchasing it in order to gage whether or not it would be worth my time, and all praised Earth Rising II: The Betrayal of Science, Society and the Soul:

1 of 1 people found the following review helpful. There's a wealth of information in this book of technology ...By martieThere's a wealth of information in this book of technology readily available and many that have been

implemented because of "crisis or issues" that drive the laws and the world we see today. Worth reading with some Edward Snowden interviews in opening up our eyes on how the gov't sometimes sneak in laws that we see today. The main reason I gave it a 4star instead of 5 is because the format of the book is very repetitive. I guess it could help, on the other hand, to remember all the devices out there.7 of 7 people found the following review helpful. Compelling WorkBy Christ AdamEarth Rising II is a compelling work. The author has a clear understanding of the nefarious forces working in our world today in order to suppress knowledge, technology, and information. He is part of a great movement.- Adam Dobrin author of 2021 - 2041: The End Times: The Battle between Good and Evil, and the Machine Known by Many Names2 of 41 people found the following review helpful. Earth Rising IIBy Dr. Eugene PattisonThis was not what I expected, and did not help me assess the prospect of a CAFO operating five miles west of where I now live.

In Earth Rising II, Begich and Roderick explore several new technology areas as well as their implications for personal privacy, security and the state of democracy in the beginning of the 21st century. In the early 1970s in the weeks before Watergate this book begins with the mysterious disappearance an airplane carrying the United States House Majority Leader Hale Boggs and Alaska Congressman Nick Begich. Decades later, documents surface that implicate the government. Their fight against a corrupt FBI, a morally bankrupt Executive Branch and fight for an open government, fully accountable to the people, may have contributed to their demise. That decades old event became the springboard to the exposure of technologies contained in this book's pages. The book includes: New Underwater Sonars and the Possible Death of the Seas. Marine Mammal and Whale Beachings A Military Side Effect. Energy in the Air and the Implications of Cell Phone Technology. Dataveillance, Security, Privacy and the End of the Road. Information Overload and the Impacts of Technology. Implantable Chips and the New Economy.Using over 300 referenced sources, the hallmark of Begich and Roderick's research efforts, concludes with a discussion of the implications of these technologies and alternative directions that are possible. The 21st Century has begun it is this generation that will determine the direction of our technology as either our master or our servant. Earth Rising II will challenge readers to seek a better direction for the people of the planet rather than the betrayal of our science, our society and our individual souls.
