**Jennifer Brush MA CCC-SLP, Margaret Calkins M.Arch. Ph.D., Carrie Bruce CCC/SLP ATP, Jon Sanford M. Arch : ECAT Sequencing Cue Cards** before purchasing it in order to gauge whether or not it would be worth my time, and all praised ECAT Sequencing Cue Cards:

The ECAT Card Pack contains the following items to assist in assessing and supporting the communication needs of people with dementia: \* Sequencing Cue Cards : a set of color illustrations that help prompt independent functioning by showing the correct sequence of actions required to complete common activities of daily living, including getting dresses, taking a shower, using the toilet, and washing one's face (separate male and female sequences provided as appropriate). \* Type Size Reading Test: A useful and reliable on-page tool that helps test whether lettering and

signage is the right size for each person's needs.\* Gray Scale Contrast Tool: A handy one-page guide that improves the visibility and effectiveness of environmental cues (including signs, furnishing, place settings, and other visual aids) by helping to determine when there is sufficient light/dark contrast between elements. \*\* No Returns if shrinkwrap opened \*\*
