United Nations : Effects of Ionizing Radiation: United Nations Scientific Committee on the Effects of Atomic Radiation - UNSCEAR 2006 Report, Volume 1 - Report to the General Assembly, with Scientific Annexes A and B

before purchasing it in order to gauge whether or not it would be worth my time, and all praised Effects of Ionizing Radiation: United Nations Scientific Committee on the Effects of Atomic Radiation - UNSCEAR 2006 Report, Volume 1 - Report to the General Assembly, with Scientific Annexes A and B:

The wide readership of this book by individuals, government officials, scientists and medical specialists is due to concern about the possible hazards of natural and man-made sources of radiation. This publication presents the consequences of exposures to radiation by the use of radiobiological research and results of epidemiological studies. It also summarizes and evaluates sources of human radiation exposures, discusses principal features of radiation risk perception and gives a brief summary and indication of perspectives. Volume 1 comprises the main text of the 2006 report to the General Assembly and 2 scientific annexes: Annex A - Epidemiological studies of radiation and cancer; and Annex B - Epidemiological evaluation of cardiovascular disease and other non-cancer diseases following radiation exposure.
