Note: This ISBN is a standalone book and doesn't include an access card/code. ELECTRONIC HEALTH RECORDS: UNDERSTANDING AND USING COMPUTERIZED MEDICAL RECORDS, 2/e is the complete "learn by doing" text for everyone who must use an electronic health records system, including doctors, nurses, medical assistants, physician assistants, and other medical office staff. It provides a thorough understanding of EHR tasks and functional benefits that is continuously reinforced by actual EHR experiences. Updated to reflect the latest EHR rules, regulations, and innovations, this new edition also contains 50% more hands-on guided and critical thinking exercises utilizing real EHR software. Improvements also include a full chapter on electronic orders and results; new workflow examples; shorter chapters that more easily accommodate 12-week courses; and a revised, clarified discussion of EM billing codes. About the Author Before becoming a full-time author and consultant, Richard Garteer served as vice president of product development and subsequently as director of design strategy at Medical Manager Research Development, Inc. His 20 years of experience in the design, development, and implementation of practice management and Electronic Health Records software dates back to the earliest days of the field. He was involved in the development of leading medical software systems including The Medical Manager, Intergy, and Intergy EHR, among others. Richard also served as a liaison to other companies in the medical computer industry as well as Blue Cross/Blue Shield plans, a U.S. Department of Commerce International Trade Mission, and various universities. He served as a voting member of two of the national standards groups currently guiding Electronic Health Record developments (ANSI X-12 and HL7 Standards groups discussed in Chapter 2). He has been a faculty member/speaker at (TEPR) the Electronic Health Records conference for over 10 years. He is the author of two previous textbooks on computerized medical systems.
