Nancy Krieger : Embodying Inequality: Epidemiologic Perspectives (Policy, Politics, Health and Medicine Series) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Embodying Inequality: Epidemiologic Perspectives (Policy, Politics, Health and Medicine Series):

0 of 0 people found the following review helpful. Scholarly but well written. When progressive people complain that

...By m c munoz Scholarly but well written. When progressive people complain that unequal opportunities are harmful, they do not always back up their assertions with data. The scientific rigor of the approach, and the data presented, are astounding.

To advance the epidemiological analysis of social inequalities in health, and of the ways in which population distributions of disease, disability, and death reflect embodied expressions of social inequality, this volume draws on articles published in the "International Journal of Health Services" between 1990 and 2000. Framed by ecosocial theory, it employs ecosocial constructs of "embodiment"; "pathways of embodiment"; "cumulative interplay of exposure, susceptibility, and resistance across the lifecourse"; and "accountability and agency" to address the question; and who and what drives current and changing patterns of social inequalities in health.

From the Publisher INTENDED AUDIENCE Epidemiologists, public health researchers, public health practitioners, public health advocates and activists, public health historians, health care providers, policymakers, social scientists; health researchers, practitioners, advocates and policymakers concerned with social disparities in health, including class inequalities (including occupational health), racial/ethnic inequalities, gender inequalities and women's health, and disparities involving sexuality (including lesbian, gay, bisexual, and transgender health) and disability. ABOUT THE AUTHOR Nancy Krieger, a social epidemiologist, is Associate Professor in the Department of Society, Human Development and Health at Harvard School of Public Health; Associate Director of the Harvard Center of Society and Health; and cofounder and chair of the Spirit of 1848 Caucus of the American Public Health Association. Krieger received her Ph.D. in epidemiology from the University of California, Berkeley, in 1989. Her background includes biochemistry, philosophy of science, and the history of public health. She also has 20 years of engagement in issues of social justice, science, and health. Her work focuses on the etiology of, monitoring of, and theories to explain population distributions of disease and social disparities in health.
