Access to the mybrady online lab code worked perfect. No problems, book was shrink wrapped and perfect condition. For those whose code did not work, you can purchase directly on website for \$15-20.1 of 1 people found the following review helpful. Book was good but

access card was useless

The book is good but don't buy the one with the Resource Central EMS Student Access Card unless you are sure this is the exact card that you need. I ended up having to buy a separate MyBrady course access card for another \$70 and as far as I've been able to find out, the card that came with the book is useless unless an instructor sets up a EMT course linked to that card. In retrospect, wish I had just bought the \$40 used Emergency Care book.

Emergency Care and Resource Central Access
By James Ferguson
I bought this book for the EMT Academy I am currently in. This book is the current requirement for EMT students and the Resource Central is a valuable tool. This was also the cheapest I found this book anywhere; the book was new and in perfect condition and arrived ahead of schedule. I recommend any EMT student to buy from here because the service is above reproach and your book will arrive in time for your school.

Emergency Care, Twelfth Edition, has set the standard for EMT training for over 30 years. Updated with the latest research and developments in emergency medical services, this edition meets the 2010 American Heart Association guidelines for CPR and ECC, providing all the practical information students need to succeed in the classroom and in the field. Using the National EMS Education Standards as a foundation, this edition goes beyond the Standards to provide the most current, accurate reflection of EMS practice today. Getting students to think like an EMT, the text integrates scientific principles in a way that's easy to understand, and a host of critical thinking features including a new chapter, Critical Thinking and Decision Making, helps students learn key concepts while getting a dose of the reality of being an EMT.
