Will Chapleau EMT-P RN TNS : Emergency First Responder: Making the Difference Textbook and RAPID First Responder Package, 2e before purchasing it in order to gage whether or not it would be worth my time, and all praised Emergency First Responder: Making the Difference Textbook and RAPID First Responder Package, 2e:

0 of 0 people found the following review helpful. DisappointedBy Limited EditionThough the information was accurate and marginally well organized, it could hardly be called comprehensive. The CD was an even greater disappointment! Minimal attention to detail and poor presentation. Would recommend the Person/Prentice Hall, 8th edition, "First Responder" by Bergeron and Baudour course as a much more comprehensive text, better organized and with a support CD that is superior in organization and presentation.

This one-of-a-kind text, pocket reference, and integrated workbook covers both the objectives in the National Standard Curriculum for the First Responder and the new National Education Standards in the recommended course length of 40-60 hours. Students get all the essentials of emergency medical response care without being overwhelmed. Real-world case scenarios provide students with true-to-life experiences, while Team Work boxes focus on the key points needed to work effectively with other emergency responders. A durable pocket guide is packaged with every text for fast, easy access at the point of care. And, an integrated workbook at the end of every chapter includes questions in a variety of formats to check student understanding! Caution! boxes provide tips and precautions for emergency first responders. Illustrated step-by-step skill sheets offer easy-to-follow instructions for performing the basic interventions required for certification. Nuts Bolts sections at the end of each chapter include Critical Points, Learning Checklists, Key Terms, and a listing of the relevant NSC objectives. A new chapter on Environmental Emergencies highlights those situations most encountered by an emergency first responder in the out-of-doors. Documentation and Communications chapter details EMS communications, the essentials of documenting patient care and covers therapeutic communication as it relates to cultural variations. Expanded coverage of response to man-made and natural disasters as well as new content on eye irrigation, alcohol and drug crises, nerve agent poisonings, and rural and industrial accidents prepares you to respond to any situation. Companion DVD features 12 skills videos and 24 dynamic medical animations.
