American Academy of Orthopaedic Surgeons (AAOS), Catherine A. Parvensky Barwell : Emergency Medical Technician Transition Manual: Bridging the Gap to the National EMS Education Standards before purchasing it in order to gage whether or not it would be worth my time, and all praised Emergency Medical Technician Transition Manual: Bridging the Gap to the National EMS Education Standards:

0 of 0 people found the following review helpful. Five StarsBy STEVEN C.all good0 of 0 people found the following review helpful. Appears to be a good bookBy PaulNever really read it. It appeared to be well laid out and presented. More book information that a street smart EMT would need. Got it about a month before taking the NJ exam to recertify after not being an active EMT for almost 20 years. Got a 96 on the recert exam without it.0 of 0 people found

the following review helpful. Four StarsBy Monito09very easy read and good book

The ideal resource for states needing to transition practicing EMT-Basics to the new EMT level, Emergency Medical Technician Transition Manual bridges the gap between the knowledge and skills based on the 1994 National Standard Curriculum and those in the 2009 National EMS Education Standards. Emergency Medical Technician Transition Manual offers focused discussions on critical knowledge areas and new skills. Each chapter opens with a summary of what EMTs should already know about the topic as well as a brief overview of the content that is new or addressed in greater depth in the National EMS Education Standards. Case studies at the end of each chapter help students test their critical-thinking skills and gauge comprehension. This concise program can be used for continuing education or bridge courses to the National EMS Education Standards.

About the AuthorThe American Academy of Orthopaedic Surgeons (AAOS) provides education and practice management services for orthopaedic surgeons and allied health professionals. The Academy also serves as an advocate for improved patient care and informs the public about the science of orthopaedics. Founded at Northwestern University as a not-for-profit organization in 1933, the Academy has grown from a small organization serving less than 500 members to the world's largest medical association of musculoskeletal specialists. The Academy now serves about 24,000 members internationally.
