Waruna De Alwis MBBS FACEM, Yolande Weiner MBChB MMed EM (UCT) FCEM (SA) FACEM :
Emergency Medicine MCQs, 1e before purchasing it in order to gauge whether or not it would be worth my time, and all praised Emergency Medicine MCQs, 1e:

0 of 0 people found the following review helpful. Brilliant for FACEM exam revision and preparation
By Kindle Customer
This book has allowed me to structure my revision around the ACEM syllabus whilst also giving me exam practice. Well written and referenced.
0 of 0 people found the following review helpful. good resource
By Customer
Useful but it occasionally goes beyond the scope of emergency medicine. This is still a good thing if you have enough time.
0 of 0 people found the following review helpful. Fantastic resource for any Medicine exam
By V Chellaboina
I like this book very much because it covers common emergency medicine topics with clear evidence

based explanations. I think this is the first emergency medicine MCQs book by FACEMs

"This is a really great study aid and I really enjoyed going through it for this review." From the African Journal of Emergency Medicine An invaluable self-assessment tool for emergency medicine trainees in Australasia. Emergency Medicine MCQs is an essential resource for Australasia's emergency medicine trainees. A practical self-assessment tool, the book assists trainees as they expand and refine their knowledge of emergency medicine, and will ultimately help them pass the Australasian Emergency Medicine Fellowship examination (FACEM). The multiple-choice questions in Emergency Medicine MCQs cover both the core and non-core areas in the Australasian Emergency Medicine Fellowship. Using this text, trainees can revise alone or with their peers to identify the areas in which they need further development. The curriculum is divided into three main areas where trainees require expert level of knowledge, high level of knowledge and general level of knowledge. It covers important clinical problems encountered in everyday emergency medicine practice from cardiovascular emergencies through to obstetric and gynaecology emergencies, disaster management and toxicology. As well as being ideal for emergency medicine trainees qualifying through AECM, the book is a useful resource for GPs taking the GEM qualification through ACEM and JMOs on call. Plus, this emergency medicine text is accompanied by an app a separate product containing 180 randomised multiple-choice questions on all the topics within the book. "This is a really great study aid and I really enjoyed going through it for this review. In addition this is not a textbook but a study aid, and particularly one aimed at multiple choice questions. So some omissions will not come as a surprise although I could not see that this detracts from the overall quality of the book in any way." Reviewed by: African Journal of Emergency Medicine / Date: Sept 14 An emergency medicine test bank, with questions and answers sections Filled with evidence-based, clinically oriented material, with references to currently relevant literature Practice Exams in Emergency Medicine App will also be released in conjunction with this text and is sold separately for iPhone, iPad, Android phone and tablet. Practice Exams in Emergency Medicine App features 3 exam papers and 60 MCQs reflecting topics covered in the core curriculum of the Australasian College for Emergency Medicine fellowship program.

"This is a really great study aid and I really enjoyed going through it for this review. I'm sure that astute users may find that some references should be included however, with publications such as these I'm sure that authors considered many more references than what is included in the end product simply due to space. In addition this is not a textbook but a study aid, and particularly one aimed at multiple choice questions. So some omissions will not come as a surprise although I could not see that this detracts from the overall quality of the book in any way." ed by: African Journal of Emergency Medicine / Date: Sept 14 About the Author Dr de Alwis obtained specialist training in emergency medicine in New Zealand and Australia and works as an emergency medicine consultant at Logan Hospital in Brisbane, Australia. As the Director of Emergency Medicine Training he contributed to the development of the training programme in the hospital since 2008. He will be practising as an emergency medicine consultant in both adult and paediatric emergency departments in The Prince Charles Hospital in Brisbane from late 2012. His special interests include specialist training in emergency medicine and healthcare leadership.
