**Kenneth Chern : Emergency Ophthalmology: A Rapid Treatment Guide** before purchasing it in order to gage whether or not it would be worth my time, and all praised Emergency Ophthalmology: A Rapid Treatment Guide:

This new handbook offers clinicians expert guidance on the most common ophthalmic problems that present to a doctor on call or to a primary care provider's office. Included is everything a non-specialist needs to know in order to

screen, identify, treat, and if appropriate, refer conditions related to the eye.

"The book provides an introduction to the anatomy of the eye and the ophthalmic exam, as well as overview of many ophthalmic emergencies. There are many high-quality glossy photos. Ocular infections and trauma are particularly well-covered. This is a well-written overview of ophthalmology directed at the general practitioner. There are outstanding photographs of diseased eyes that highlight key features of urgent eye disease and useful clinical pearls. 3 Stars."--Doody's Service (Doody's 2002-12-01)From the Back CoverIllustrated in full color, this guide provides everything nonspecialists need to screen, identify, treat, and if necessary, refer conditions of the eyes, generally the most difficult emergencies faced by nonophthalmologists In this much-needed resource, an ophthalmologist explains what primary and emergency care medical personnel must know to care for frequently seen eye problems. \* Guides you in step-by-step eye exams \* Offers quick, visual access to answers in 175 illustrations \* Covers conditions from simple eyelid inflammations to blow-out fractures and chemical splash injuries \* Includes chapters on glaucoma, traumatic injuries, pediatric eye problems, retinal/vitreous conditions, and more \* Explains procedures and standards for a number of useful tests \* Provides clear guidelines on when to refer \* Complete with numerous Pearls More than emergency treatment reference, here is an excellent way for primary care providers to gain a solid working knowledge of ophthalmology.About the AuthorDr. Chern wrote his first book as a resident at Cleveland Clinic (1996): REVIEW QUESTIONS IN OPHTHALMOLOGY. The book is published by LL/WW and is considered the book of choice for board review. His second book entitled OPHTHALMOLOGY REVIEW MANUAL was recently published by LL/WW.
