**Jeffrey T. Lindsey Ph.D : EMS Communications and Information Technology (Ems Management)** before purchasing it in order to gage whether or not it would be worth my time, and all praised EMS Communications and Information Technology (Ems Management):

EMS Communications and Information Technology is designed to provide EMS managers a foundational understanding of communications and information technology. Teaching and Learning Experience Examples throughout the text help the EMS manager effectively create a vision and a program, regardless of the complexity or simplicity of the program.
