I bought this to help study for my NREMT at the Basic level, and to take with me to a First aider job. It was small enough to keep in a cargo pocket of my shorts and fits in my EMT pants pocket. This is Worth every penny, I was able to quickly reference sections that I had questions on. The booklet is made out of a type of plastic-like paper so there's no worries about getting fluids on it or having it fold/tear up easily.

I carried this book for 5 years on the ambulance - it is an essential piece of gear in my opinion.
