dysrhythmias on an ecg and interpreting them into which algorithm i am supposed to use. and also there are not as many pasg pants ?'s which is good because in at least michigan they are elimanting the use of the mast pants and the pants are no longer on the ambulance. thank you again for your help mr. westfal, it was much appreciated.0 of 0 people found the following review helpful. After being a paramedic for seven years, I still refer to it when I refresh my EMT-P level knowledge. Get this book, you will not be disappointed.
