That is why I can't give the book 5 stars. Each review book has its ups and downs. I recommend buying two different workbooks to study (especially for Nat'l Reg.)This workbook is a perfect addition if you have the Brady text series. There are references to the page/book numbers in the answer section. This is helpful so that you can review the sections in which you feel you need more help.The answers to the

questions in the workbook are sufficient, especially because the reference pages are provided. However, in studying for Nat'l Reg, the answers could be better. I wish that the answers would include the rationale behind why the other choices are wrong. A downside is that the workbook goes into great detail. It has 56 chapters, including this sampling: ethics, gastroenterology, airway management, documentation, spinal trauma, neonatology, HazMat. (If you are studying for NREMT-P test, you don't need to go into that great of detail.) But, if you are studying for quizzes in school, it could be helpful. The book includes a CD, which is an excellent addition. It contains 2 180-question tests, which are in two different formats. One downside to the CD exams is that the answers aren't as good as they are in the workbook. The CD also contains other helpful information, such as a glossary and D.O.T. objectives. 0 of 0 people found the following review helpful. good book for the price By Ken M This is 2004 printing. book was in very good condition. The same questions as was in Success for the Paramedic. The Review manual EMT paramedic cost \$1.28 plus shipping. Success for the Paramedic had all the questions answered. and cost \$28.000 of 0 people found the following review helpful. Best Prep Books out there... Any Cert Level By D. Gabriela Decker This is the only prep book I've used when getting ready for exams and so far have passed EMT and EMT-Intermediate on first try. Now trying for Paramedic. Questions are tough to make the test seems easier. You will be well prepared, if not slightly over-prepared. The CDs have great quizzes on them... use them to judge how well you do and then study those areas you need work in. Good Luck!
