**Russellyn S. Carruth, Bernard D. Goldstein : Environmental Health Law: An Introduction** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Environmental Health Law: An Introduction:

0 of 0 people found the following review helpful. Great overview. Read it before the course By E. C. Hart Great overview. Read it before the course!

This important resource offers a comprehensive overview of the major U.S. environmental laws and approaches, strategies, standards, and enforcement techniques by which American law protects our environment and our health. Written for the non-lawyer, the book puts the spotlight on general concepts that go a long way to demystify the American legal system (what law consists of, who makes it, how it is made, and how it is enforced). The authors also

introduce the major environmental laws and evaluate issues, controversies and developments in environmental policy.

From the Back Cover  
**Environmental Health Law** Environmental Health Law offers a compendium of the major US environmental laws as well as strategies, standards, and enforcement techniques by which American law protects our environment and our health. Written in accessible language for the non-lawyer, this important resource puts the focus on general concepts and demystifies the American legal system by explaining what a law consists of, who makes it, how it is made, and how it is enforced. In this book, Russel S. Carruth and Bernard D. Goldstein—experts in the field of environmental health law—introduce the major environmental laws that govern air and water pollution; regulate the manufacturing, distribution, uses, and disposal of hazardous substances; protect workers and the workplace; and protect the safety of our drugs, food, and water. The book also addresses issues and controversies in environmental policy with an eye towards understanding future developments in the law.

**About the Author**  
Russel S. Carruth, JD, has developed and taught courses on environmental law to both law and public health students at the New Jersey Graduate Program of Public Health and at the University of Pittsburgh. Previously, she was in private law practice in Anchorage Alaska. Bernard D. Goldstein, MD, is professor emeritus of Environmental and Occupational Health and former dean of the Graduate School of Public Health, University of Pittsburgh. He served as assistant administrator of the EPA and was the founding director of the Environmental and Occupational Health Sciences Institute of Rutgers University.
