Peter J. Fos : Epidemiology Foundations: The Science of Public Health before purchasing it in order to gage whether or not it would be worth my time, and all praised Epidemiology Foundations: The Science of Public Health:

0 of 0 people found the following review helpful. Five Stars By Terri Kempker great book. awesome service 0 of 0 people found the following review helpful. Great textbook By Ann The book is detailed, and easy to read. 0 of 0 people found the following review helpful. Four Stars By Kristyn Olsen Good condition

Written by Peter J. Fos an expert in epidemiology with more than twenty years teaching experience Epidemiology Foundations offers an ideal introduction to the theory and practice of public health epidemiology. This important text discusses both the historical perspective and future trends of epidemiology, reviews health and disease, and explains how they are measured. The book's overview of epidemiological studies shows how they are used in practice.

Epidemiology Foundations takes a social and community perspective and includes information about global diseases and epidemics. Emphasis on concepts such as population health, social determinants, and global health make this book especially interesting and accessible to those new to the subject. Each chapter is supplemented with problem-solving exercises and research assignments to aid readers in understanding its epidemiology principles. Reflecting and expanding on recommendations of the Association of American Colleges and Universities, Epidemiology Foundations is the ideal text for any course introducing epidemiology in public health.

About the Author Peter J. Fos is provost and professor of health sciences at the University of Texas at Tyler. He is an internationally known decision scientist and epidemiologist. He maintains adjunct faculty positions at the University of Southern Mississippi College of Health and at the University of Alabama in Birmingham, School of Health-Related Professions, and is a visiting scholar at the Medical University of South Carolina, College of Health Professions.
