**Katherine L. Hunting, Brenda L. Gleason : Essential Case Studies In Public Health: Putting Public Health into Practice (Essential Public Health)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Essential Case Studies In Public Health: Putting Public Health into Practice (Essential Public Health):

0 of 0 people found the following review helpful. Five StarsBy BinhGreat product. Quality is solid.0 of 0 people found the following review helpful. School BookBy MaineGirlThis is exactly the book I needed for school. This class uses it all the time. The book can be a little hard to follow at times but otherwise is well written and informative.0 of 0 people found the following review helpful. Five StarsBy Jadira MaldonadoMet my expectations

Essential Case Studies in Public Health: Putting Public Health into Practice is a unique compilation of twenty-one cases based on real life events and problems. Written by over forty public health faculty members and practitioners, these cases vividly illustrate how professionals across various disciplines tackle public health challenges. Covering a wide range of topics and issues from HPV vaccines as school entry requirements to implementing community-based water systems in rural Honduran communities to a mumps epidemic in Iowa, this text helps students apply a wide range of knowledge and skills relevant to public health outbreak investigation, policy analysis, regulatory decision-making and more. Suitable as a stand-alone text or as an adjunct to any introductory public health text, this collection of engaging case studies provides students with the opportunity to synthesize and apply each of the five components of the Public Health 101 curriculum framework: the public health approach; tools of population health; disease: determinants, impacts, and interventions; healthcare and public health systems; and special areas of public health focus. Selected cases can be readily applied to courses across the curriculum.
