It was great ... just some of the recommendations in the reading are a little out dated since this is an older edition. Other than that, I am very happy with this book!!!0 of 0 people found the following review helpful. Very happy with this bookBy Sarah HankeyVery happy with this book! My class required the newest edition but I purchased this one instead with out a problem. The two versions are very similar.0 of 0 people found the following review helpful. Five StarsBy Beau D BraunA+++++

Written by foremost experts in the field, the 2nd Edition of this concise, well-organized text presents the latest common diagnostic and treatment-related procedures that you need to know. Its clear and concise hands-on guidance takes you step by step through the "how-to's" of more than 70 procedures. You'll also find important information on what needs to be done before and immediately following a procedure. It also provides the background and rationale behind each procedure. A host of supporting information in areas such as patient education, informed consent, billing, and delivering bad news ensures that you have all of the information you need to deliver the best and safest care to your patients. Features more than 200 illustrations depicting procedure steps and other important concepts. Presents information on patient preparation and the use of instruments and materials to help ensure the safe and effective performance of procedures. Highlights warnings to alert you to specific dangers, and points out what not to do when performing a procedure. Includes guidance on possible complications, rationales, and precautions to provide an overview of the "why," and not just the "how," of procedures. Covers nonprocedural issues including informed consent, standard precautions, patient education, and procedure documentation. Offers comprehensive updates throughout to incorporate new procedures and practices. Features new chapters on removing Cerumen foreign bodies from the ear * corneal abrasion and foreign body removal from the eye * endometrial biopsy * diabetic foot care * conscious sedation * ambulatory care billing and coding * and delivering bad news

REVIEW OF THE PREVIOUS EDITION: "Congratulations are in order for University of Iowa faculty David Asprey and Richard Dehn...this text is the first clinical procedures text for PAs that has been published, likely filling a need in the clinical education arena. Congratulations to both Asprey and Dehn!" - Physicians Assistant Newsletter
