1 of 1 people found the following review helpful. like three examples are needed to illustrate something she is ...By Rick McLaughlinAbsolutely the worst text book Ive ever had to use in 7 years of school!!!! Overly word, filled with fluff. They takes 10 sentences to say one thing and then it's still cloudy what point she was trying to make. Often it comes across as patronizing and [personally opinated, like three examples are needed to illustrate something she is

trying to say. Poor use of reflection questions. I don't need 50 in each chapter !!! I can actually think and reflect for myself and don't need to be led by my nose. Its quite evident the authors are biased towards their own personal views. It is obviously written by people in ivory towers that have never been nurses or mD'sHorrible text book.0 of 0 people found the following review helpful. But overall good learning tool!By George BurnettIt really makes you think for yourself given different ethical situations which I think is great! But for beginning learners I think it should also include some helpful outcomes in some of the ethical dilemas..But overall good learning tool!0 of 0 people found the following review helpful.
