**American Academy of Pediatrics, American Heart Association : Neonatal Resuscitation Textbook** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Neonatal Resuscitation Textbook:

0 of 0 people found the following review helpful. Save a Little LifeBy cool in RocklinThe information in this book is the best. I am a NICU nurse and so I have to renew my Neonatal CPR . On the job there are many times when I have to use these very techniques on our little patients. By studying this book you can keep calm and know what to do in an emergency.22 of 23 people found the following review helpful. Neonatal Resuscitation 6th Edition through By Janice A. BakerWhenever a new edition comes out, I like to purchase my own for constant review and referral during the years it is current. The DVD that comes with this book has helpful reenactments to help visualize the flow chart in most situations. As true in previous editions, the book is laid out in such a way to promote easy understanding and reinforcement. This edition definitely is worth buying due to the new changes. It's just not the same old same. Further,

the time it took to get the book and the condition were both excellent.0 of 0 people found the following review helpful.  
Neonatal Resuscitation TextbookBy EllieI purchased this textbook, because I needed it for the class in neonatal resuscitation. Unfortunately, it is very hospital orientated, and I am a home birth midwife. I need this class to keep up national certification. It does a very good job of preparing you to take the tests that need to be accomplished, before you are actually able to take the class. The instructor that I use is very good at applying the materials for out of hospital settings. So I am pleased with the combination. I also have an Apple Computer with new operating system, so the disc that comes with the book does not work in my computer. It would obviously be very good for this company to make a disc that does work in the Apple computer or tell us before we buy. But this complaint has been registered multiple times, without any fix. I have written to the company to ask for an Apple disc when it is available, but I am not holding my breath.

Enrich teaching and learning with dynamic next-generation NRP resources from the AAP and American Heart Association. This extensively enhanced self-study resource delivers a wealth of multimedia educational tools in one value-packed package. It includes all-new lessons on resuscitating preterm babies and ethical issues; updated lessons with must-know new content; newly updated Key Points sections, case scenarios, color photos, and Megacode; and much more. The all-new DVD-ROM (for PC use only) makes the learner an active participant with hands-on multidecision-point scenarios plus dynamic video footage of actual resuscitations and animated 3-D demonstrations. A DVD-based presentation builder lets instructors enrich courses with high-impact video clips. All program materials conform with updated AAP/AHA guidelines; new multinational evidence-based consensus on science; consistent focus on increasing instructor flexibility, accommodating diverse learning styles; and program-wide emphasis on Key Points to create a coherent multimedia learning experience.
