Suzanne Tink Martin MACT PT, Mary Kessler MHS PT, Mary Kessler, Suzanne Martin : Neurologic Intervention for Physical Therapist Assistants before purchasing it in order to gauge whether or not it would be worth my time, and all praised Neurologic Intervention for Physical Therapist Assistants:

0 of 0 people found the following review helpful. Five Stars By Fruity_Mom Same information that is found in the newer addition, but cheaper

Here's the first textbook of neurologic techniques specifically written for physical therapy assistants. The first section covers the basic structure and function of the nervous system, normal motor development, motor control and motor learning, pathophysiology, common treatment interventions and techniques, and the role of the physical therapy assistant in clinical practice. Sections two and three present techniques for working with adults and children with neurologic disorders and trauma. Case studies in SOAP format and critical thinking questions prepare students for

clinical decision making. An abundance of detailed illustrations demonstrate positioning, movement facilitation, handling, cuing, and patient exercises. Information is presented in a consistent, user-friendly format. Review questions help readers build their mastery of the material.

About the Author Suzanne "Tink" Martin, PT, MACT, Associate Professor, Department of Physical Therapy, University of Evansville, Evansville, IN. Mary Kessler, MHS, PT, Assistant Professor, Department of Physical Therapy, University of Evansville, Evansville, IN.
