Glenda Esmond, Christine Mikelsons : Non-Invasive Respiratory Support Techniques: Oxygen Therapy, Non-Invasive Ventilation and CPAP before purchasing it in order to gage whether or not it would be worth my time, and all praised Non-Invasive Respiratory Support Techniques: Oxygen Therapy, Non-Invasive Ventilation and CPAP:

0 of 0 people found the following review helpful. Non-Invasive Respiratory Support TechniquesBy Kindle CustomerVery informative book and written for those with some previous medical experience, though very easily

read. I was most interested in the CPAP section and not disappointed by the amount of info given.

Respiratory support techniques for treating respiratory failure - including oxygen therapy, non-invasive ventilation (NIV) and continuous positive airway pressure (CPAP) - are used in a variety of healthcare settings, which include intensive care units, high dependency units, respiratory wards and the community. In response to national guidelines there are growing numbers of patients being considered for non-invasive respiratory support techniques, both as a short and long term treatment, resulting in an increasing number of healthcare professionals requiring knowledge and skills to provide care. Written for qualified healthcare professionals with experience of caring for patients with respiratory conditions, this text provides a practical guide to oxygen therapy, NIV and CPAP, clearly defining how and when the various treatments are used and including ideas on developing protocols to support practice.

From the Back Cover Non-invasive respiratory support techniques are increasingly considered for treating respiratory failure in patients, in response to national guidelines, both as a short and long-term treatment. An increasing number of healthcare professionals require knowledge and skills to provide non-invasive respiratory support in a variety of healthcare settings, including intensive care units, high dependency units, respiratory wards and the community. Written for qualified healthcare professionals with experience of caring for patients with respiratory conditions, *Non-Invasive Respiratory Support Techniques: Oxygen Therapy, Non-Invasive Ventilation and CPAP* provides a practical guide to oxygen therapy, non-invasive ventilation (NIV) and continuous positive airway pressure (CPAP), clearly defining how and when the various treatments are used and including ideas on developing protocols to support practice. About the Author Glenda Esmond is Lecturer in Respiratory Nursing, City University. Christine Mikelsons is Lecturer in Physiotherapy, University of Hertfordshire.
