Nursing Approach to the Evaluation of Child Maltreatment provides the information nurses need to identify and accurately interpret and report signs of maltreatment. Focusing on the intersection of nursing and child maltreatment, this book provides procedural guidelines for medical contact with abuse victims. Over 20 chapters, Nursing Approach

to the Evaluation of Child Maltreatment addresses physical abuse, sexual abuse, and neglect. Each chapter provides an overview of its subject, detailed treatment plans for specific types of abuse, easy-to-use checklists, and examination guidelines and flow charts for quick reference. To provide nurses and nurse practitioners with an expanded understanding of child maltreatment, this text covers a wide range of relevant topics, including: -Domestic violence and its effect on children -Online victimization and child sexual exploitation on the Web -Munchausen's syndrome by proxy -Legal issues related to child maltreatment This latest edition of Nursing Approach to Child Maltreatment is an invaluable resource to nurse and other professionals in a position to identify and report child maltreatment. Such professionals include pediatric nurses, family nurse practitioners, school nurses, advanced practice nurses, and social service personnel. Nursing Approach to the Evaluation of Child Maltreatment clearly demonstrates how to identify abuse and details both common and unusual types of child maltreatment. Edited by a forensic and psychiatric clinical specialist, with chapters contributed by experts in fields related to child maltreatment, this authoritative reference is a must-have for nurses, nurse practitioners, and professionals who may encounter child abuse in the clinical setting.

Nursing Approach to Child Maltreatment, 2e is a well-articulated, comprehensive overview of violence perpetrated against children. It underscores the indispensable role of nurses in the assessment, evaluation, and treatment of vulnerable children seen on the frontline of health care and emphasizes adverse consequences of child abuse, including those affecting the physical, emotional, cognitive, and social well-being of the family. The risk of early trauma reaching beyond childhood into adolescence and adulthood is also explored. Nurses practicing in diverse specialties will benefit from the clinical and theoretical applications proposed in the text. This insightful composition of scholarly work is a welcome addition to the science of nursing. --Marie E. Mugavin, PhD, FNP-BC, SAFE-A Adjunct Assistant Professor University of New Mexico School of Medicine Department of Emergency Medicine Family Nurse Practitioner Sexual Assault Forensic Examiner First Choice Community Healthcare Albuquerque, NM This new edition of Nursing Approach to Child Maltreatment, 2e offers essential, updated information about the evaluation procedures and techniques necessary for a comprehensive assessment of a child with potential physical and sexual abuse and other forms of maltreatment. There have been major advances in our understanding and approach over the ten years since the first edition, and this revised text provides a broad knowledge base to understand key aspects of medical history, examination, and laboratory evaluation while recognizing additional critical steps needed within the multidisciplinary team to promote emotional healing and prevent further injury. Frontline nurses and advanced practice nurses play a vital role in the safety net for children, and the nursing approach in this text builds upon our evolving science to extend these contributions to children in a variety of settings in the hospital, office, and community. --Vincent J. Palusci, MD, MS, FAAP New York University School of Medicine New York, NY This text, written by experts in the field of child maltreatment, is set to become the most widely used reference for those in practice today. It is comprehensive in its approach to the care of child maltreatment victims. Experts in various fields share their knowledge, from understanding the scope of the problem to assessment and treatment, while including a thorough review of legal implications. Our knowledge in all areas affecting maltreated children has grown exponentially over the past several years, and research supports changes in assessment techniques and treatment. These authors came together to produce a text that, while written for the nurse clinician, has the potential to serve various collaborating professionals as well. It is set to become a standard reference in the library of the many clinicians who work to make life better for children and to prevent maltreatment in the future. --L. Kathleen Sekula, PhD, APRN, FAAN Professor Director, Forensic Graduate Programs School of Nursing Duquesne University Pittsburgh, PA About the Author Paul Thomas Clements, PhD, RN Paul Thomas Clements is an Associate Clinical Professor. A psychiatric / forensic specialist, he is additionally a Certified Gang Specialist and Certified in Danger Assessment. His clinical experience includes serving as Assistant Director/Bereavement Therapist at the Homicide Bereavement Center at the Office of the Medical Examiner in Philadelphia, Pennsylvania, and he was appointed as the Director of Operations for the City of Philadelphia Department of Public Health. He is an experienced therapist, forensic consultant, and critical incident/trauma response specialist with over 20 years experience in management/administration and crisis intervention. He was involved in the television and printed news media, as well as interviewed on National Public Radio (NPR), related to discussions regarding the offender, victims and survivors of the Virginia Tech shootings. Paul Clements has numerous publications and conference presentations regarding stress, trauma, violence and aggression, coping after violent death and exposure to interpersonal violence and crime. He is an Advanced Practice Psychiatric Nurse (APRN, BC) with national board certification as a Specialist in Child, Adolescent and Family Mental Health Nursing. He holds a Doctor of Philosophy in Psychiatric Forensic Nursing from The University of Pennsylvania. Ann W. Burgess, DNSc, APRN, BC, FAAN Ann Burgess is an internationally recognized pioneer in the assessment and treatment of victims of trauma and abuse. She has received several honors for her work including the Sigma Theta Tau International Audrey Hepburn Award, the American Nurses Association Hildegard Peplau Award, and the Sigma Theta Tau International Episteme Laureate Award. Her research with victims began when she co-founded one of the first hospital-based crisis counseling programs at Boston City Hospital with Boston College sociologist, Lynda Lytle Holmstrom. Since then, she has worked with the FBI Academy special agents

to study serial offenders and the links between child abuse, juvenile delinquency, and subsequent perpetration. Ann Burgess has also studied young abuse victims and the impact of trauma on their physical and psychological development, their families, and communities. Her recent research includes studies in elder abuse in nursing homes, cyberstalking, and Internet sex crimes. She is currently a professor at the Boston College William F. Connell School of Nursing and teaches courses in victimology, forensic science, forensic mental health, case studies in forensics, and forensic science labs. Theresa M. Fay-Hillier, MSN, PMHCNS-BC Theresa Fay-Hillier is an Assistant Clinical Professor in the College of Nursing and Health Professions. She received her Master's Degree in Psychiatric Mental Health Nursing from the University of Pennsylvania and a Bachelor of Science in Nursing from Holy Family University. She is currently enrolled in the DrPH program in the School of Public Health Community Health and Prevention at Drexel University. She is a board certified Clinical Nurse Specialist in Psychiatric and Mental Health Nursing by the American Nurses Credentialing Center and has a certification in using the Danger Assessment Tool. Ms. Fay-Hillier has an interest in working with the chronically mentally ill as well as people who are victims of abuse. Her experience in her areas of interest have been numerous and in a variety of community settings. She was a co-leader of a homicide bereavement group for families at the Philadelphia City Morgue. Ms. Fay-Hillier was also a co-owner of a nurse owned business providing critical incident stress debriefing services to employees who worked in both health care agencies and general business facilities.
