THE DEFINITIVE TEXT ON THE PRINCIPLES AND CLINICAL PRACTICE OF NURSING HOME CARE  
Doody's Core Title for 2017! Nursing Home Care is a practical textbook designed to serve as a rich evidence-based resource to provide physicians and other practitioners with the information and knowledge to advance nursing home care. It states and explains the principles underpinning safe, personalized, and dignified nursing home practice using an integrated, cooperative approach. In addition, it provides the medical knowledge necessary to give quality care to

nursing home residents. Nursing Home Care reflects the International Association for Geriatrics and Gerontology's conviction that nursing home practice is an interdisciplinary endeavor that requires a sound theoretical, scientific, and values base in addition to clinical expertise. Mindful of the influences of different culture and context, the premise of this text is that there is a shared and common knowledge base to guide nursing home practice and approaches to caring that are universal. THIS UNIQUE TEXT IS LOGICALLY DIVIDED INTO FOUR PARTS: PART 1 covers the origins of the nursing home movement, plus alternative approaches, including aging in place and what older people are saying about nursing home life and culture change. PART 2 focuses on the fundamentals of working as part of a nursing home team providing day-to-day care and the leadership essentials to drive the quality improvement agenda. PART 3 addresses the most common conditions experienced by older nursing home residents. PART 4 is devoted to clinical and nursing aspects of specific disease management. KEY FEATURES: Online supplemental material, including 1,000 PowerPoint slides available to faculty, plus QA available from the IAGGI \* Over 150 multiple choice questions \* Key points for each chapter \* An essential study guide for the IAGG certificate in nursing home care
