This book is so informative. As a nursing major, this book (and my professor of course) made me fall in love with nutrition. I enjoyed reading it although the chapters are so long lol but if you are going into being a dietitian or a nurse I highly suggest this book and I hate to read! I literally am pursuing to get my masters in Nutrition after my bachelors in nursing because of this book lol

Great text. easy to read. Provides lots of images, graphs and statistical data to support the information provided. This is one text I will likely utilizing in my post nursing school life.
