Get the best instruction on occupational analysis, group process, and therapeutic media - all from one book! Using a matter-of-fact style to share their experiences, successes, and failures, expert authors Jane Clifford O'Brien and Jean W. Solomon provide you with effective therapeutic media; sample activity analyses useful in current health care contexts; practical guidance in play, leisure, and social participation areas of occupation; strategies for effective group management and processes; and overviews of theories supporting best practice.

"The greatest selling point of this book is, indeed, the clear connection with practice. Again, a well thought-out feature is the inclusion of all the tools for practice in a well-organised final section. As an occupational therapist working in mental health, this easy-to-follow book has already begun to inform my own group programmes and I would strongly recommend this to anyone working with groups or studying to do so." *British Journal of Occupational Therapy*, September 2013
