"The key to passing the test is not only knowledge, but practicing taking multiple-choice questions, and these questions most closely match the ones on the exam. I think that this is the best exam review guide on the market." Paula Kramer, PhD, OTR/L, FAOTA, University of the Sciences in Philadelphia "The greatest strength of these review questions is that there are so many questions rich in diverse material and that the questions are so similar to the questions on the actual exam. Additionally, the explanations help in correcting the reader if he/she is thinking on the wrong track. As a former student, I would have felt far more comfortable taking the test after having finished reviewing all these questions." Amy Perez, OTR/L, Graduate from Xavier University
