**Jane Case-Smith EdD OTR/L FAOTA, Jane Clifford O'Brien PhD OTR/L : Occupational Therapy for Children, 6e (Occupational Therapy for Children (Case-Smith))** before purchasing it in order to gage whether or not it would be worth my time, and all praised Occupational Therapy for Children, 6e (Occupational Therapy for Children (Case-Smith)):

4 of 4 people found the following review helpful. Disorganized, repetitiveBy A. LeRequired to purchase this book for OT school. I typically enjoy reading, especially when it's relevant to my profession. HOWEVER, this book is EXTREMELY disorganized and repetitive. You will be reading about one thing in one section, only for it to be repeated in another. It's not like it EXPANDS on the topic, it just repeats itself. Also, when discussing about chronological order of certain things, it'll go from youngest to oldest (children's age) for expected behaviors then switch it up in another chapter and go from oldest to youngest (children's age). Extremely confusing---not a book I will

Excellent book!By travlinmamaGreat book. You can feel the heart and soul the authors put into this! It was a required text for my OTA program -- goes into more detail than I need (is designed more for OT/R programs) but very interesting, thorough, good reading. Very helpful.
