**Occupational Therapy with Elders: Strategies for the COTA, 1e** before purchasing it in order to gage whether or not it would be worth my time, and all praised Occupational Therapy with Elders: Strategies for the COTA, 1e:

1 of 1 people found the following review helpful. Excellent for Geriatrics in OT By Purpleotas This is an excellent text for OT Geriatrics. My only complaint was the print is pretty small, but I would buy this book all over again. It helped carry me through Geriatric Interventions. 1 of 1 people found the following review helpful. Great Textbook By JacquelineLove this textbook it is informative for the practice of OT in the geriatric population. It helped me tremendously in the OTA program! I've had this book for 2 years and will continue to use it in my career. 1 of 1 people found the following review helpful. Great book to use for class By Feather Jocelyn Great book to use for class. Stays in one piece and I don't have to worry about much damage. Good information and very useful.

Working with elders in skilled nursing homes and intermediate care facilities has become the number one practice area for COTAs. This is the only book available to fill that need! It will not only be a required classroom text in OTA programs, but it will also become an indispensable reference text for COTAs in practice in long-term and immediate-term care facilities, home care organizations, rehabilitation programs, and hospitals. This is a highly readable, user-friendly text containing many case studies and scenarios which relate concepts to real-life clinical practice for a COTA.\* Provides a holistic approach to common diagnoses, emphasizing both psychological and physical aspects of aging. \* Comprehensive coverage includes concepts of aging as well as occupational therapy intervention with elders. \* Key topics include documentation, ethical aspects, public policy, cultural diversity, health promotion, working with elders who have visual impairments, considerations of mobility, and much more. \* The Practice Settings chapter provides an overview of the various settings in which a COTA might practice (specific to working with elders). \* Contains key terms, chapter objectives, chapter review questions, problem-solving exercises, case studies, narratives/scenarios, and a glossary. \* Features an Appendix with useful information including: How to Obtain Guidelines for the MDS; Restraint Reduction Resources including chairs, alerting systems, personal alarms, signs, foam/cushions, firm wheelchair seats, and walkers; Resources to Assist the Older Driver; Publications to Assist Family and Caregivers; Support Groups and Referrals; World Wide Web Sites.
