Richard Riegelman, Brenda Kirkwood : One Health: From AIDS to Zika before purchasing it in order to gage whether or not it would be worth my time, and all praised One Health: From AIDS to Zika:

0 of 0 people found the following review helpful. Spaceship Earth needs earthlings to understand One Health Paradigm.By Larry DuffyThis book gives a common point of view which is unbalanced with it focus on infections that are transmitted by vectors.The book has a figure showing a balance figure showing 3 links rings showing a balance between domains.However, the environment and ecosystem services are not covered very much.Overall, it gives the novice an good introduction.0 of 0 people found the following review helpful. Four StarsBy Debbi MurphyIt's for a

class I'm taking - what's to love about studying? :)0 of 0 people found the following review helpful. Waste of money
By Jeann Leal
This image is really misleading. The book is really small and it is only printed in two shades of green. Waste of money.

One Health: From AIDS to Zika is a short, printed supplement that addresses the new One Health educational expectations of the Council on Education for Public Health (CEPH). Ideal as a complement to any introductory Public Health text, One Health: From AIDS to Zika includes test questions, an instructors' manual, and comprehensive PowerPoint Lecture Slides. Designed to address the One Health expectations for graduate as well as undergraduate public health students as proposed by CEPH, this 60 page analysis is also suitable for courses in Nursing, Health Science, and Allied Health. Under the umbrella of One Health, we can make a difference through education by enhancing the collaborative effort of multiple disciplines - working locally, nationally, and globally to attain optimal health for people, animals, and our environment. As stated in the chapter, One Health: From AIDS to Zika ... 'We're "all in it together" is no longer just about the human race, it's about the health of all living things.' --Bernadette Dunham, DVM, Ph.D., former director of the Center for Veterinary Medicine (CVM) at the U.S. Food and Drug Administration
