Various : Ophthalmic Medical Assisting: An Independent Study Course, 5th ed. (Textbook) before purchasing it in order to gage whether or not it would be worth my time, and all praised Ophthalmic Medical Assisting: An Independent Study Course, 5th ed. (Textbook):

1 of 1 people found the following review helpful. Great book and very well written and easy to understand.By P.KellyI am really impressed with how well this book is laid out. It is a great teaching tool and I would encourage all who want to learn in the field of ophthalmology to purchase this book. Even if you have been in the field a while, it is a nice refresher book.0 of 0 people found the following review helpful. Five StarsBy kevin jakubowiczExactly the same book you need for your COA home study course!0 of 0 people found the following review helpful. Five StarsBy JeromeOutstanding

The fully illustrated core textbook describes 44 procedures step by step and covers all topics in both the U.S. and international curricula. It includes new chapters on ocular motility; low vision; ethics, legal and regulatory issues; and community health eye care. Each chapter includes self-assessment questions and suggested activities and resources. Successful completion of the course serves as a prerequisite for the Certified Ophthalmic Assistant (COA) examination administered by the Joint Commission on Allied Health Personnel in Ophthalmology (JCAHPO). This product is the TEXTBOOK ONLY.
