**MD Keiichi Morishita : Overcoming Cancer: The Natural Medicine Diet Therapy** before purchasing it in order to gage whether or not it would be worth my time, and all praised Overcoming Cancer: The Natural Medicine Diet Therapy:

0 of 0 people found the following review helpful. Great!By R. S.New vision on cancer.Great!7 of 7 people found the following review helpful. Extraordinary Scientific Evidence for Eating a Plant Based DietBy C. VannThis Japanese doctor has over 30 years of experience studying and doing experiments on where blood is made. He tells us it is made in the intestines. Book contains survivor stories of 25 or more cases of cancers, and other difficult to remit diseases. Showing that a plant based diet with sea vegetables is extremely powerful for recovery and continued health. Menus are given at the back of the book to give the reader and idea of what to eat. His Natural Therapy Clinic uses interesting ways to measure whether you are too expanded or contracted and how that can affect your health. This could change your life.

Definition of cancer in modern medical science is very disappointing. It is as follows: By some cause or other, a cell in your body goes through a mutation or sudden change and becomes abnormal. Once it becomes abnormal, it multiplies by division indefinitely. First of all, the definition says, By some cause or other... This is the same as saying We do not know why. So to speak, since they do not know the cause, there is no way they can come up with a measure to cope with it. Then it says, A cell in your body goes through a sudden change... A concept such as sudden change is not scientific or logical. Every change in nature has its cause. The fact that they still use words like sudden change shows that today s life science is still very immature. To say the least, the fact that they use words like sudden change in their definition of cancer means that they have not had looked at cancer closely enough in a scientific manner. Carcinoma is just an end product. It is not the cause itself. If you only attack the end product without dealing with the cause, your problem will never go away. When you get cancer, you re almost automatically subject to one of three therapies: 1. Surgical therapy, 2. Chemotherapy and/or 3. Radiation therapy. But you will never be cured completely. Chemotherapy kill cancerous cells but at the same time harms healthy cells and organs too. Radiation therapy is a very dangerous treatment. The cancer tissues undergone treatment may be destroyed, but normal tissues along the way also receive a radiation. As a result, both chemotherapy and radiation therapy can become emerged causes to new cancer. From Chapter 2.

About the Author 1950 Graduated from the Tokyo Medical University. 1955 Received Ph.D. from Chiba University, the school of Medicine. 1960 Presented a basic theory of Natural Medicine for cancer treatment and longevity (Morishita Theory) 1966 Testified as a member of the academic panel at the hearing on cancer by the special Committee for Advancement of Scientific Technologies of the Japanese House of Representatives. 1970 Established the Natural Medicine Society, the Life Science Association and Ochanomizu Clinic 1977 The effectiveness of Natural Medicine was endorsed by the McGovern Report written by Senator George McGovern of the U.S.A. 1982 The validity of the theory, Diet of meat produces cancer; diet of grain/vegetables prevents cancer, presented at the hearing was proven by the National Academy of Science (USA) Recommendation .
