Book is pretty meh but one of the only ones for the topic...By ShiroThis book is full of information, examples, charts, and helpful pictures; however, the book reads like a repetitive run on sentence. You also get a massive amount of information in a section that has little to do with the topic then the next topic is exactly that useless bit from the last topic cut and pasted. An editor would be nice. As well as bold terms with defined definitions. It is also hard to find information because of the lack of bold terms. Hard to look back and find information in the book as well without having to reread a whole chapter or section of a chapter.0 of 0 people found the following review helpful. other than that it is a good textbook.By that guyit is what is said it was, the only problem was when it was delivered it was folded and shoved into the mailbox when creased the entire book, other than that it is a good textbook.0 of 0 people found the following review helpful. Better editing needed.By PatTransaction was fine. The text appears as a series of copy and pasting entries as many phrases repeat one another, sometimes

within the same paragraph. It covers a TON of content, so specificity suffers, but the editors could have consolidated many statements throughout. Also, more diagrams will help the reader. This book relies too heavily on straight text. Still, as a quick reference and not a definitive guide, this book suits its purposes.

With other texts written at either too high or too low a level, this book meets the needs of PTA students for usable, understandable pathology related to clinical application. Extensively illustrated, this book allows students to more easily comprehend and maintain interest in otherwise complicated pathological processes. The fourteen chapter format effectively fits within a chapter per week course structure, or each chapter may be used as a stand alone module within any course. And as your students prepare to graduate, encourage them to keep this book to use as a clinically relevant reference as practicing PTAs!
